

# ***Incorporating Agriculture into Academia***

**Student Worksheet**      **Name** \_\_\_\_\_

1. If you aren't from a farm and have no intention of farming, why would you want to go into an agricultural related career?

How would you gain experience to help you better understand agriculture?

2. Read one of the featured person articles and answer the following questions:

- a. What does that person do for a living?

- b. How does that person use the subject area skills or information in their career?

- c. Did the person list any regrets or things that they would do differently?

3. Looking at all the career areas listed on the first page, list three you might be interested in. Using "An Agricultural Career For You", can you find which career cluster those careers fit into? What type of education do you think is needed for that career? (i.e. college, technical school, no schooling). What high school classes do you think would be helpful in preparing for this career?
